### Single, Glazed Side Panel Left

Fire rating: FD30    Certification body: IFC

FDNA Serial Number: A000000307

**ACTIONS**

- QR Code — Detach
- NFC Tag — Assign
- Installation complete
- Action required — Inspect
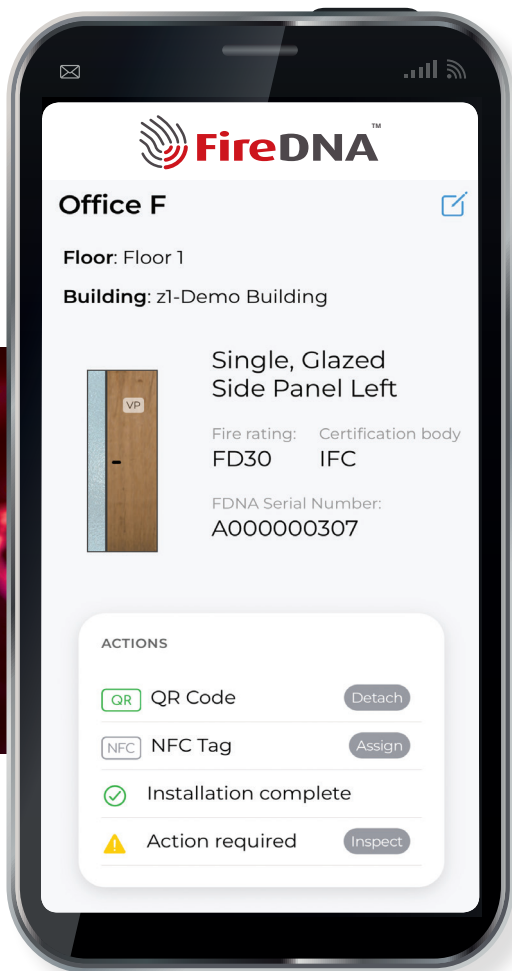

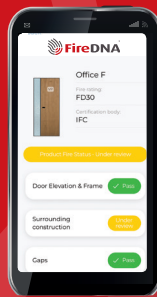

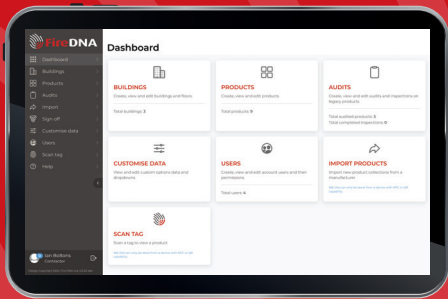

# The future of passive fire product monitoring.

# FireDNA delivers, clear, accurate, accessible, unambiguous, up-to-date information.

FireDNA software catalogues Manufacturers product data, digitally shares it with Contractors and Installers, who in turn add their installation data, passing that onto Building Owners, FM's & TMO's. That data can then be used by Maintenance Teams, Fire Inspectors and viewed by Tenants and Residents alike, with a simple swipe of a smartphone.

**Why not try it out for yourself, scan the QR Code opposite to see the free Tenants and Residents summary view.**

**Manufacturers:** Upload their certificates, input production data, specification PDF's, installation guidance and 3rd party certification.

**Contractors & Installers:** Add installation statements, compliance / competency evidence and images, which they can share with their clients and Building Control.

**Fire Inspectors:** Conduct audits and create reports, with photographs which output to detailed MS Word Docs and Excel spreadsheets.

**Building Owners, Management Teams and TMO's:** Manage the compliance data and ongoing maintenance records and updates.

**Maintenance Teams:** Access work schedules and update the 'live status' once remedial works are completed.

**FireDNA helps to protect the public across all sectors:** Residential, Commercial, Education, Healthcare, Retail and Government, giving peace-of-mind to Tenants and Residents that the passive fire products in their buildings are compliant and safe.
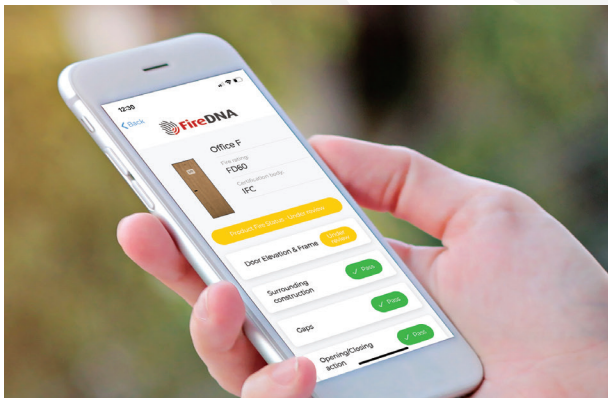

**FireDNA** links everyone in the chain of responsibility.

# FireDNA Software Features & Benefits...

**FireDNA** is the professionals choice, developed in collaboration with Passive Fire Product Manufacturers, Installation Contractors and Qualified Fire Door Inspectors. The FireDNA benefits are numerous and extensive and include the following:

- **Facilitates the Golden Thread of information**
- **Helps to enforce regulatory compliance**
- **Improves collaboration and communication**
- **Creates time and cost savings**
- **Increases productivity and efficiencies**
- **Enables accurate auditing and reporting**
- **Builds an accessible 'digital' O&M Manual**
- **Delivers critical data at the time of need**
- **Helps to reduce risk and liability**
- **Supports BS 8644-1 2022 'digital management'**

Find out more about how FireDNA can specifically benefit you, your business and your customers on our website or by talking to our team.

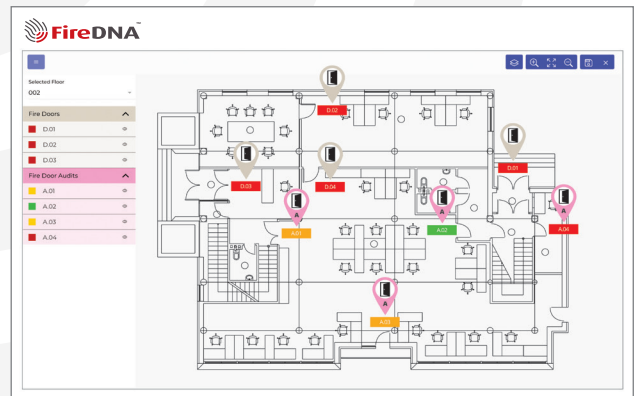

**FireDNA** helps to ensure Architects' specifications are enforced from inception to installation.

**FireDNA** gives user's the ability to produce Audit Reports with detailed descriptions and photographic evidence.

**FireDNA** creates a visual and digital identification that connects the physical product with its digital record.

**FireDNA** also allows user's to plot Passive Fire Products onto Floorplans, which can also be output into Reports.

# Join the FireDNA Network Alliance and become a Data Partner today...

**FireDNA Network Alliance**™ | DATA PARTNER

**FireDNA** allows Contractors and Installers to document and date stamp passive fire product installations. Sign-up today and you'll be able to input/access manufacturer's product 'DNA' data: installation guidelines and specifications. This will enable you to ensure that the product supplied was as specified and to confirm that your assigned fitters have been able to install the product to the manufacturer's installation instructions.

The more passive fire products you activate with FireDNA, the more benefits and rewards you could receive!
